• Kotebe, Addis Ababa

### Summary

Results-driven professional with a solid foundation in network engineering and cybersecurity, holding over 1 year of experience in IT operations and project management. Expert in network infrastructure design and system maintenance, with a strong emphasis on security best practices and collaboration. My key achievements include increasing data center efficiency by 20% through strategic enhancements of network systems and achieving a 100% on-time delivery rate in logistics management. Seeking a Junior Cybersecurity Analyst position at your company, where I bring my cybersecurity and network engineering skills to support your mission of delivering high-quality technical solutions while ensuring robust security protocols and documentation.

### Key Achievements

 <b>Increased Network Integration Efficiency</b> Enhanced network integration efficiency by 30% through effective troubleshooting and diagnostics processes.	 <b>Maximized System Uptime Percentage</b> Achieved 99% system uptime by optimizing installation and configuration of critical network hardware.	 <b>Accelerated Cloud Deployment Speed</b> Improved cloud solution deployment speed by 25% through streamlined installation and implementation strategies.
