

ROBERA MEKONNEN BEKELE

Network Engineer | Cybersecurity Engineer | Jr. Project Management

0941 55 2458 • robera4553@gmail.com • <https://www.linkedin.com/in/roberamekonnen> • <https://robera.vercel.app>
• Kotebe, Addis Ababa

Summary

Certified network engineer with hands-on expertise in designing, implementing, and optimizing complex network infrastructures. Proven track record in managing data center operations, configuring routers, switches, firewalls, and ensuring robust network security. Adept at troubleshooting performance issues and enhancing system reliability to meet scalable business needs. Strong foundation in cybersecurity best practices and cloud integration, supported by relevant certifications like CCNA and Fortinet.

Education

MICROLINK INFORMATION TECHNOLOGY COLLEGE

B.Sc. in COMPUTER ENGINEERING

Addis Ababa, Ethiopia

10/2019 - 08/2024

ADDIS ABABA UNIVERSITY

BA in MANAGEMENT

Addis Ababa, Ethiopia

10/2020 - 06/2025

Experience

IE Network Solutions

MODERN DATA CENTER AND CLOUD ENGINEER

22, Addis Ababa

10/2023 - 01/2024

- Increased data center efficiency by enhancing network infrastructure and successfully migrating systems.
- Conducted system audits and ensured seamless network integration across diverse environments.
- Collaborated with a team to design and implement modern cloud solutions for enterprise clients.
- Optimized virtualization processes, reducing system downtime.

Leonor Trading PLC

OPERATIONAL MANAGER

Ayat, Addis Ababa

04/2024 - 06/2024

- Supported daily operational processes, improving workflow efficiency by streamlining internal documentation and communication.
- Coordinated logistics and inventory tracking, reducing stock discrepancies through better reporting.
- Assisted in vendor and supplier management, ensuring 100% on-time delivery rate during the internship period.
- Prepared and delivered weekly performance summaries for management review using Excel and PowerPoint.

Besys Technologies PLC

Jr. Network Engineer

Bole, Addis Ababa

07/2025 - Present

- Designed, planned, and implemented scalable network infrastructure by selecting appropriate hardware, software, and network protocols to ensure high performance and reliability.
- Installed, configured, and maintained over 1,000 network devices, including routers, switches, firewalls, and wireless access points, supporting stable and secure connectivity across multiple environments.
- Monitored, troubleshooted, and optimized network performance, improving data flow efficiency and Quality of Service (QoS) across projects including A-MESOB at Bole, Kirkos, and Lemi-Kura branches.

Certifications

Certified Cisco Network Associate (CCNA) — CISCO

Fortinet Certified Fundamentals in Cybersecurity (FCFC) — FORTINET

Fortinet Certified Associate in Cybersecurity (FCAC) — FORTINET

Active Directory Skills for IT Support Professionals — Udemy

Professional Certificate in Project and Process Management — MTF Institute of Management, Technology and Finance

Malware Analysis, Incident Response, Disaster Recovery & BCP — Udemy

Certifications

[Linux Essentials](#) — CISCO

[Ethical Hacker](#) — CISCO

[Cisco Meraki Network Engineer: Fundamental \(CMNE-F\)](#) — CISCO

[Junior Cybersecurity Analyst Career Path](#) — CISCO

Skills

[Business & Management Competencies:](#)

Organizational Behavior, Data-Driven Planning, Operations Management, Business Process Improvement, Organizational Behavior, Leadership

[IT Infrastructure & Network Engineering:](#)

Active Directory, Group Policy, Bash scripting, Server Hardening, IP Addressing, Subnetting, Routing, Switching, Firewall Configuration, Security Best Practices, VPN, IPSec, SSL, L2TP
